Objective

Work Experience

- **Project:** Design and Development of a Bulk SMS System with AI SMS Personalisation
- **Systems Engineering:** Architected a microservices ecosystem using Apache Kafka, Docker, and REST APIs to enable scalable and fault-tolerant SMS campaign processing.
- **Artificial Intelligence:** Built a hybrid AI pipeline leveraging K-Means clustering for subscriber segmentation and LLMs with prompt engineering for dynamic personalized message generation (SMS).

Jun 2024 - Sep 2024 LARAVEL DEVELOPER - REMOTE Responsibilities:	RUYA TECH	Paris, FRANCE
Designed and developed web applications using Laravel, focusing on scalable, reliable, and high-performance solutions. Collaborated remotely with the development team to deliver business-oriented features and optimize user experience.		
Jan 2024 - Jun 2024 FULL STACK & AI DEVELOPER Responsibilities:	WARACHAT PLATFORM	Remote, ALGERIA
Project: Intelligent Product Catalog for a BTP Marketplace Developed an ML/NLP-powered solution for product standardization, classification, and catalog optimization using Python, Laravel, and Livewire.		
Dec 2023 - Mar 2024 LARAVEL DEVELOPER - REMOTE Responsibilities:	TECH FLY - MINIMO	Oran, ALGERIA
- Tech Fly: a development box specializing in digital solutions. - Focused on clean code & project architecture, deepening expertise in Laravel/Livewire. Gained experience in building efficient systems.		
Jun 2023 - Mar 2024 IT SOLUTIONS CREATOR Responsibilities:	CONCENTRIX	Algiers, ALGERIA
Developed a room booking system with a mobile app (Flutter) for users to reserve rooms and a web management app (Laravel) for administrators to manage bookings.		

Volunteer works

Sept 2021 - Sept 2024 TRAINER & COACH EVENT ORGANIZER TEAM LEADER IN DESIGN & WEB Responsibilities:	Scientific Club - CSCC	Blida, ALGERIA
Training & Mentorship : Trained over 50 students in UI/UX design, web development, and graphic design through both onsite and online sessions. Team Leadership : Led a team of 10+ students on web and design projects, promoting collaboration, creativity, and technical skill development. Event Management : Organized scientic events such as conferences, workshops, and tech challenges, signicantly increasing student engagement and participation.		

Education

- Sep 2024 - Jul 2026 : **Blida 1 University - USDB1 Algeria**
Master's Degree In Computer Systems & Networks (SIR)
- Sep 2021 - Jul 2024 : **Blida 1 University - USDB1 Algeria**
Bachelor's Degree In Computer Science
- **BAC YEAR : 2021**
Scientific stream - Mention : Very Good (TRÈS BIEN (16.24/20))

Skills

- **AI & Data Analytics:** LLMs, LoRA/PEFT, HuggingFace, Prompt Engineering, NLP, Machine Learning, K-Means Clustering, RAG, Data Analytics, Power BI
- **Backend & Architecture:** Python, Java, PHP, Laravel, Spring Boot, Apache Kafka, Docker, Microservices, REST APIs.
- **Frontend:** React, Livewire, Flutter, JavaScript, HTML/CSS.
- **Databases:** MySQL, PostgreSQL, MongoDB, SQL, Database Modeling, Data Normalization.
- **Tools & Design:** Git/GitHub, Power BI, Excel, Figma, Adobe XD, Adobe Photoshop, Adobe Illustrator..

Key Projects

- **Medical AI Chatbot :** Fine-tuned a large language model using LoRA/PEFT for domain-specific medical dialogue, applying prompt engineering and evaluation on healthcare QA benchmarks.
- **VisaEdu | Full-Stack Educational Platform :** Developed a full-stack platform connecting students with international study opportunities using JavaEE, Spring Boot, and REST APIs.
- **Web Projects & Platforms:** WebHelp Management App, LRDSI Website, Alpha Interim Website, CSCC Website, Room Booking System, Stock Management App, Various E-commerce Websites (GitHub).
